

UAE INVESTOR PRESENTATION · OCTOBER 2026

LastTable

The AI-powered revenue engine for UAE hospitality

From empty tables to intelligent growth.

Fill empty tables. Acquire new diners. Grow automatically. · Confidential · Figures are scenarios unless marked verified

THE PROBLEM

A table that sits empty tonight cannot be sold tomorrow

1,200

New restaurant licences in Dubai in 2024

Every new opening competes for the same diners. Source: Dubai Department of Economy and Tourism, via WAM.

11,813

Restaurants and cafés open in Dubai, end 2018

Latest official total we found; the stock is higher today. A fixed supply of seats per night, fought over by thousands.

Pay first

Most diner acquisition is paid before any result

Ads, discounts and commissions are charged whether or not a new guest sits down.

We do not quote a loss-per-empty-table figure: no verified data yet. Measuring it is a pilot goal. · 02

WHY NOW

Five shifts make performance-based dining growth possible

01

Discovery is digital

Dubai welcomed 19.59m international overnight visitors in 2025, a third record year.

02

Convenience wins

Deliveroo UAE added in-app reservations in June 2026: booking is now a habit inside everyday apps.

03

Crowded supply

1,200 new licences in 2024. Hotels ran at 80.7% occupancy: demand is there, unevenly spread.

04

AI marketing

Live availability can drive targeted campaigns that were too costly to run by hand.

05

Pay on results

Restaurants want to pay for a new diner who attends, not for clicks.

Sources: Dubai DET 2025 tourism results (Gulf News); Khaleej Times / Gulf News on Deliveroo UAE reservations; WAM. · 03

THE SOLUTION

One growth ecosystem, three connected systems

Marketplace

Diner app and web: discovery, live availability, instant booking, Flash Tables.

Built · UAE in preview on demo venues

Restaurant SaaS

LastTable Business: reservations, tables, guests CRM, analytics, credits and billing.

Built · live in the Ireland pilot

GrowthOS · KafoAI

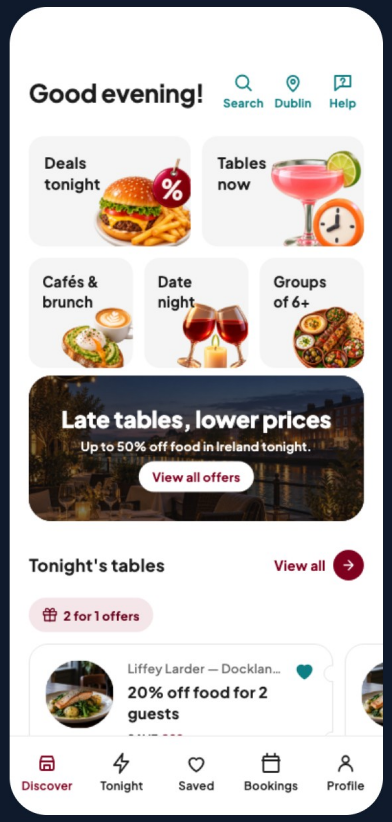

A separate AI system for outreach, campaigns and growth, connected through secure APIs.

Read API deployed · campaigns planned

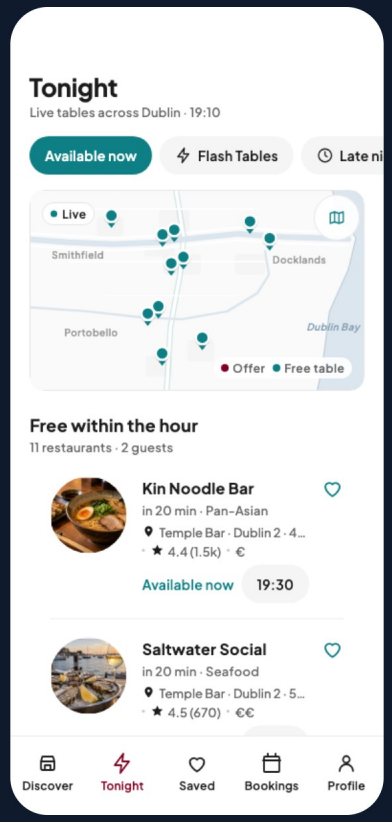

GrowthOS is not part of the LastTable app. Status from the repository as of 21 October 2026. · 04

THE DINER EXPERIENCE

From search to seated in four taps

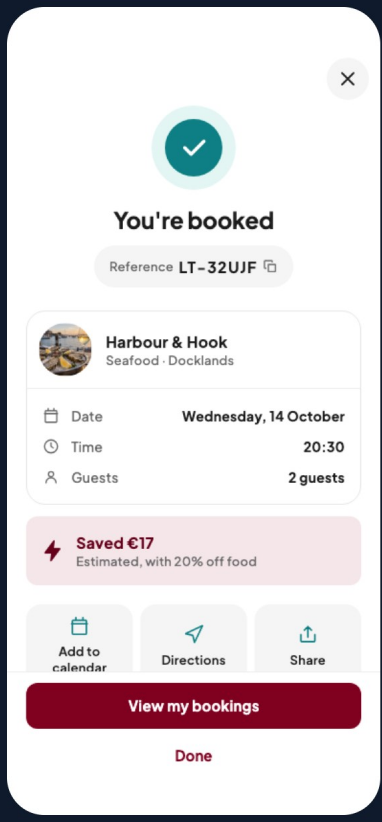

Discover

Select

Reserve

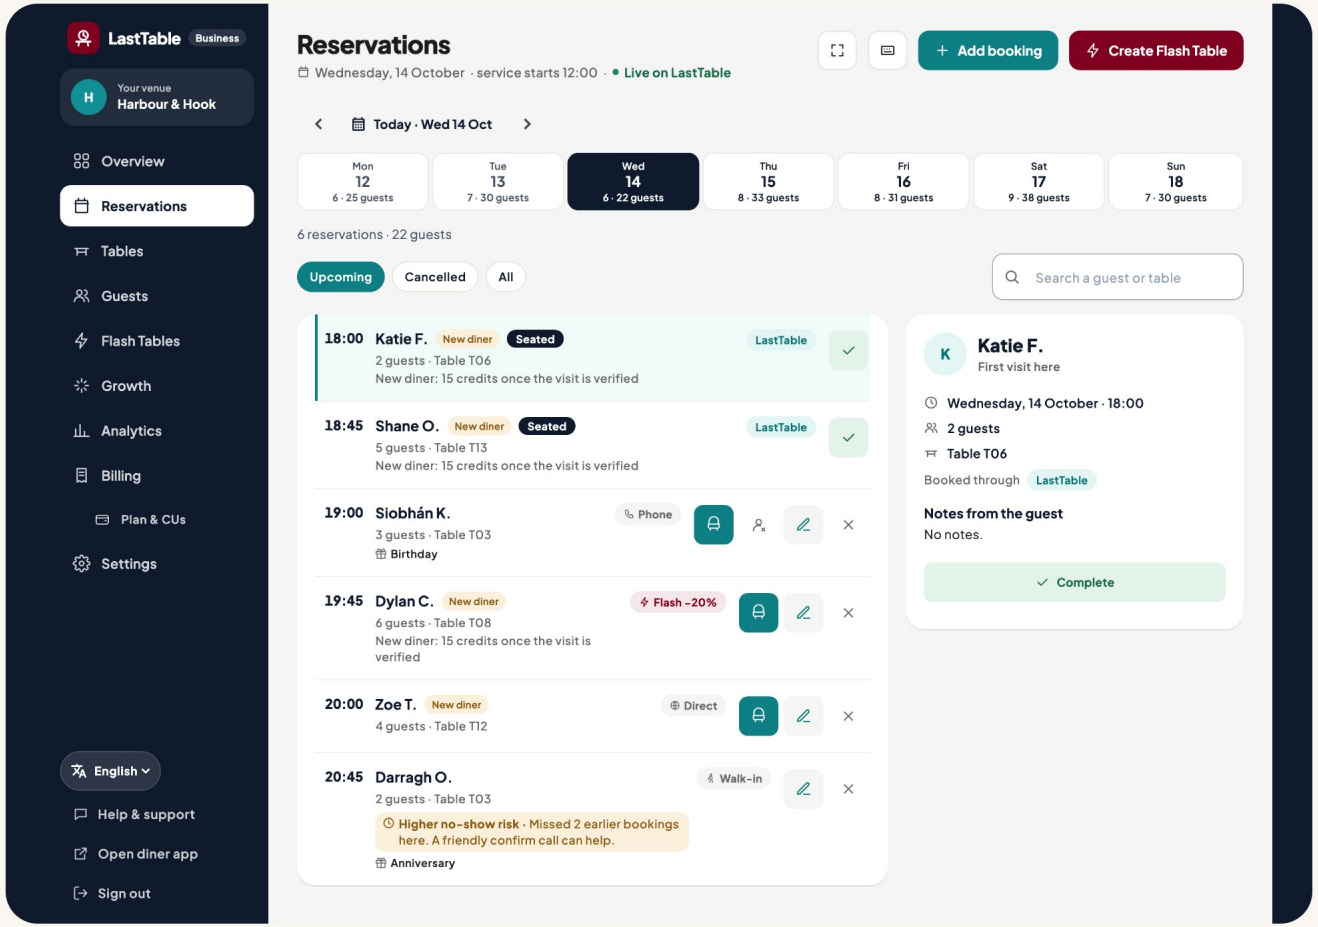

Dine

Real app screens, English, demo data. Arabic (RTL) and six more languages are built. · 05

THE RESTAURANT EXPERIENCE

Run the room, and see where new guests come from

- Tables, hours and booking rules set by the venue
- Seat, complete and no-show in two taps
- Walk-ins and phone bookings in the same book
- Every new diner flagged, every credit shown

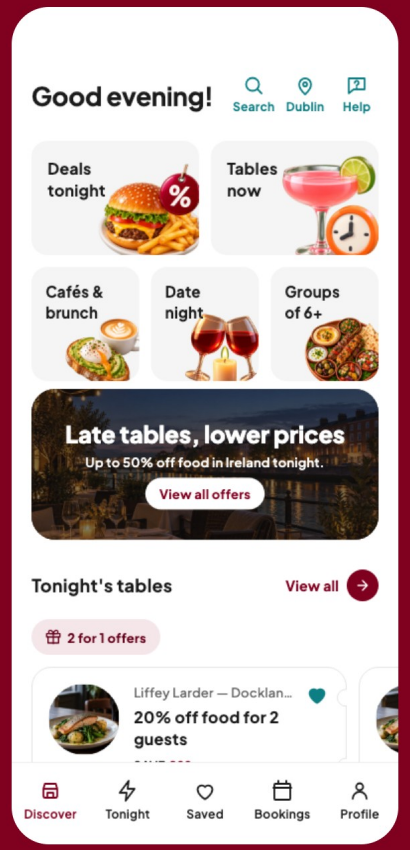

LastTable Business, real screen with demo data. Live in the Ireland pilot. · 06

FLASH TABLES

An empty table, filled before the night starts

The restaurant chooses a table, a time window and an offer. Diners nearby see it live, book in seconds, and the table is gone when the window closes.

- **Set by the restaurant, never by LastTable**
- **Time-limited, so it never trains guests to wait for discounts**
- **Built and shown live in the diner app**

BUSINESS MODEL

Three revenue engines, one wallet of credits

ENGINE 1 · LIVE LOGIC

New-diner credits

15 credits

Per verified new diner who attends: about AED 12 at AED 0.80 a credit. 20 credits (about AED 16) when the AI Growth Manager brings them.

ENGINE 2 · LIVE IN IRELAND

Restaurant SaaS

3 tiers

Free, Growth (100 credits a month) and AI Pro (300 a month), plus Enterprise for partners. UAE AED prices to be confirmed.

ENGINE 3 · PLANNED

AI Growth Manager

AI Pro

Subscription for AI tooling, with usage costs in credits. New diners it delivers are the only acquisition charge.

Credit rates from the pricing catalogue. AED credit price and plan prices are placeholders pending owner confirmation. · 08

WHY THE MODEL IS DIFFERENT

Acquire new diners. Keep your regulars.

A new LastTable sign-up is not automatically a new customer for a restaurant. We charge only when the diner is new to that venue, verified, and attends.

Booking type	Charge
New diner, verified, attended	15 credits
Returning diner	Free
Existing regular	Free
Direct booking	Free
Cancelled booking	Free
Verified no-show	Free
Returning diner reactivated by AI	Free

UAE MARKET OPPORTUNITY

A bottom-up pool of AED 186m, starting with Dubai

AED 186m
TAM · all UAE eat-and-drink places
About 24,800 places (Overture Maps, Sept 2026) × AED 7,500 revenue per venue a year

AED 31m
SAM · Dubai sit-down venues
About 4,100 (assumed 35% of 11,813 outlets) × AED 7,500

AED 3.6m
SOM · year 3, base case
About 475 average active venues

Context: UAE foodservice about USD 18.6bn in 2025 (IMARC), spend we influence, not revenue. Venue share and AED 7,500 are our assumptions. · 10

COMPETITIVE LANDSCAPE

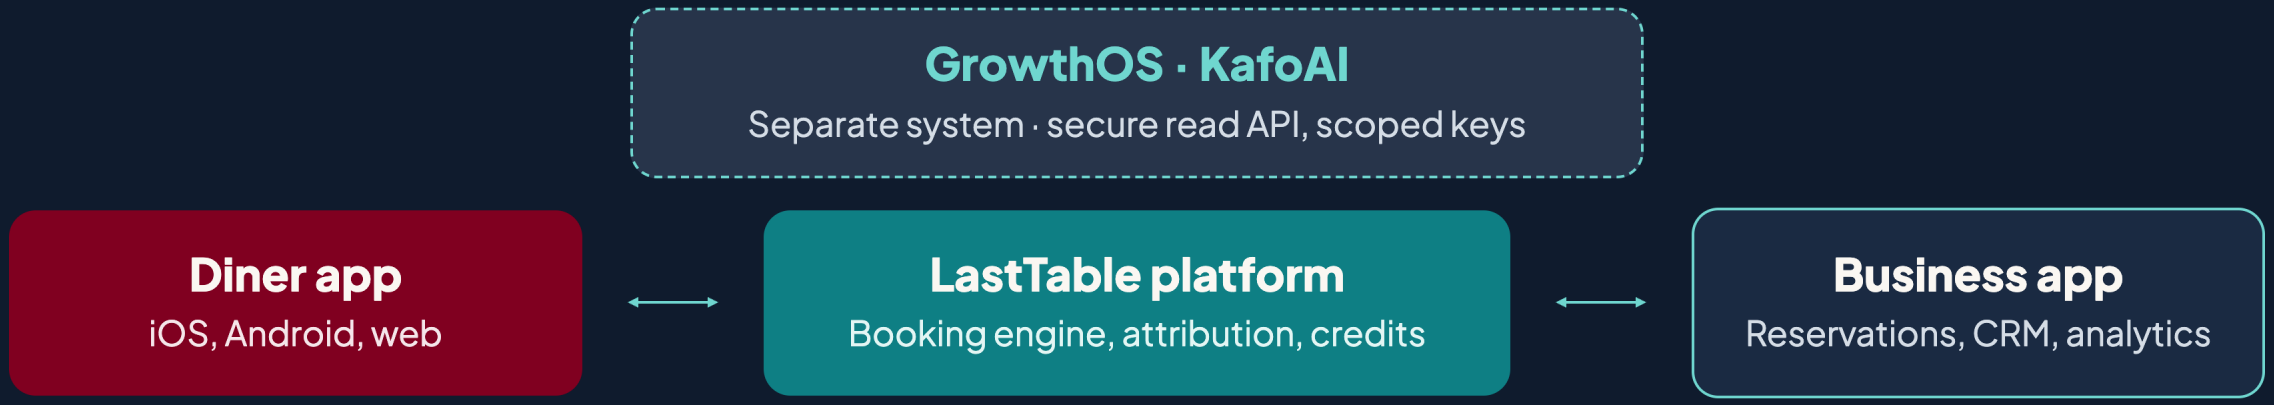

Others sell software or seats. LastTable sells new diners, on results.

Platform	Commercial model (public sources)	Gap LastTable targets
OpenTable	Plans plus per-cover fees on network bookings	Fees per seat, limited UAE footprint
Eat App	Dubai-founded SaaS, Free to about USD 139 a month	Software first, no results-based acquisition
SevenRooms	Enterprise CRM, quote-based; powers Deliveroo UAE reservations	Built for groups, heavy for independents
TheFork, ResDiary	European reservation platforms, UAE presence not verified	No Arabic-first, last-minute focus
LastTable	Pay only for a new diner who attends, plus optional SaaS	Flash Tables, Arabic RTL, AI growth layer

From public vendor pages and comparisons; vendor-hosted sources lean positive. Verify before external use. · 11

TECHNOLOGY ECOSYSTEM

One platform in the middle, AI connected from outside

Stripe and RevenueCat billing · SMS and email confirmations · WhatsApp codes (built, off) · Foodics POS (idea only)

Irish project, 20 Oct 2026: 114 migrations, 43 Edge Functions deployed. UAE project deployed, no real venues yet. · 12

AI GROWTHOS

Empty capacity becomes a campaign, and a booking we can attribute

1
Empty capacity
Live slots show a quiet Tuesday

→

2
Campaign idea
AI drafts offer and audience

→

3
Restaurant approval
Owner approves or edits

→

4
Targeted promotion
Flash Table to likely diners

→

5
Booking
Diner books a live table

→

6
Attribution
New or returning? Charge or free

Built today: rule-based Growth Manager proposes Flash Tables, owner approves, credit cap enforced.

Planned: KafoAI campaigns, outreach and content through the API. Not operating yet.

Illustrative workflow. Autonomous capabilities are shown as planned. · 13

PRODUCT ROADMAP

From bookings to hospitality intelligence in four phases

PHASE 1 · BUILT

Discovery and bookings

- Live availability
- Flash Tables
- Business app
- Arabic and English
- Credits and SaaS billing

PHASE 2 · IN PROGRESS

Restaurant growth

- Analytics and guest CRM
- Cancellation Radar
- Campaign kits
- WhatsApp (planned)

PHASE 3 · PLANNED

AI hospitality

- GrowthOS / KafoAI campaigns
- AI onboarding and outreach
- AI concierge on live slots

PHASE 4 · OPPORTUNITY

Intelligence

- Occupancy forecasts
- POS links, e.g. Foodics
- Groups, memberships

Phases 3 and 4 are roadmap, not commitments. Phase 2 items listed are built or being built per the repository. · 14

UAE GO-TO-MARKET · PROPOSED

Win four Dubai districts, then widen the map

STAGE 1
Dubai pilot
Marina, JBR, Downtown, DIFC

STAGE 2
Dubai expansion
More districts, hotel restaurants

STAGE 3
Abu Dhabi
Second city, same playbook

STAGE 4
Wider UAE
Sharjah, other emirates

Restaurants
Claim offer of AED 500 (625 credits) after the first paid top-up

Sales agents
AED 100 per restaurant, paid in two steps of AED 50

Partners
Hotel groups and agencies (to be agreed)

Local marketing
Diner campaigns in launch districts

A proposed strategy, not a completed launch. UAE legal review and a 2-for-1 permit decision are still open. · 15

FINANCIAL PROJECTIONS · SCENARIO, AED

Base case reaches AED 3.6m revenue in year 3 and monthly break-even near month 30

Base case	Year 1	Year 2	Year 3
Average active venues	30	155	475
New diners delivered	7,200	55,800	228,000
Acquisition revenue (AED 12 to 14 each)	86k	725k	3,192k
SaaS revenue (15% to 30% paying)	9k	91k	371k
Total revenue	96k	816k	3,563k
Year-end SaaS MRR	1.6k	12.2k	45.6k
Operating expenses (assumed)	1,100k	1,900k	2,800k

YEAR 3 REVENUE BY SCENARIO

Conservative 1.24m · Base 3.56m · Optimistic 9.62m

UNIT ECONOMICS, ASSUMED

CAC about AED 1,100 per venue. Contribution margin 75%. Payback about 3 months.

All figures are scenarios with no verified UAE revenue. Verified today: 0 paying UAE venues. Model assumptions are in the notes. · 16

INVESTMENT REQUIREMENT · ILLUSTRATIVE SCENARIO

AED 1,000,000 buys about 13 months to prove Dubai

Product, AED 250k
UAE launch, Arabic polish

Restaurants, AED 220k
Agents, onboarding

Diners, AED 150k
Launch districts

AI, AED 100k
GrowthOS integration

Operations, AED 130k
Team, support

Compliance, AED 80k
PDPL, licences, legal

Working capital, AED 70k
Buffer

Milestones
25 venues by month 6, 60 by month 12

AED 1m is an illustrative scenario, not a confirmed target. Runway assumes about AED 75k monthly spend; base case needs about AED 2.5m to break-even. · 17

THE VISION

From booking platform to hospitality growth infrastructure

Prove Dubai with a small, measured pilot. Then let every empty table become an intelligent, attributable campaign.

Join the pilot round. [Name · email · phone]

Burgundy marks Flash Tables. · 18
